Mechanism for grievances in Internal Examination (2022-23)

Firstly, any kind of grievance in internal examination is forwarded to the Grievance Redressal Cell (GRC). Then the Grievance Redressal Cell conducts its committee meeting to find out the truthfulness of the complaint or the malpractices related to the examination. After proper study, they give their final decision to the examination committee for further action based on documented evidence.

The Examination Committee accepts the decision of the Grievance Redressal Cell and takes action on it. The above figure shows the mechanism for grievances in internal examination.
